

Nestable plastic pallet for loads up to 2200lbs in racking for an evenly distributed load. Due to the special design, the new NestRack<sup>®</sup> plastic pallet is nestable and at the same time suitable for high rack storage. With a net weight of only 22 lbs, the pallet can carry up to 2200lbs with evenly distributed load in racking. A revolutionary weight-to-load ratio. The runners ensure smooth transport on roller and chain conveyors and offer 4-way access for forklift trucks. The NestRack<sup>®</sup> comes in two versions: with open or closed deck.

**Bottom support**

> 4 runners (4R)

Wide foot for increased stability

Open deck

**Deck options**

> open deck (OD)

> closed deck (CD)

Available with 4 handles

Runners ensure smooth transport on roller and chain

## Technical data\*1

Anti-slip: 8 optional grommets (feet, under deck)

ESD prevention: –

\*1 Figures can vary depending on the raw material used and options applied. \*2 Guideline values are based both on experience and parts of test ISO 8611, which tests with evenly distributed loads at room temperature (68°F / 20°C). Varying data may result from different conditions of usage. Your specific requirements can be identified upon request. \*3 Minimum quantity required ACM pallets should only be used and stored in a dry environment. We reserve the right to change any of the stated information without prior notice.
