

The DigiTech digital lock eliminates the need for user keys and vastly reduces the associated costs. The wide range of functionality this lock offers gives the users increased flexibility in the control and access of their personal storage.

With a solid zinc alloy housing, ten-digit keypad, multiple fixing points and a secure key override as standard, the DigiTech digital lock is the perfect choice for a wide variety of applications.

The DigiTech lock can be used with the optional RAS (Remote Allocation System) which adds the ability to remotely manage the locks, eliminating site visits. This lock is suitable for numerous applications including lockers, cupboards, medical cabinets, furniture and other enclosures.
